Professional profile

I am a Software Engineering student with a diverse set of skills in programming, desktop publishing, web design, server-side development, among other fields. My main objective is to continue growing professionally, therefore, I am looking for opportunities that allow me to continue learning and applying my knowledge.

Education

- Academic Bachelor School: Industrial Technical Institute Facatative | 2021
- Software programming technician Sena | 2023
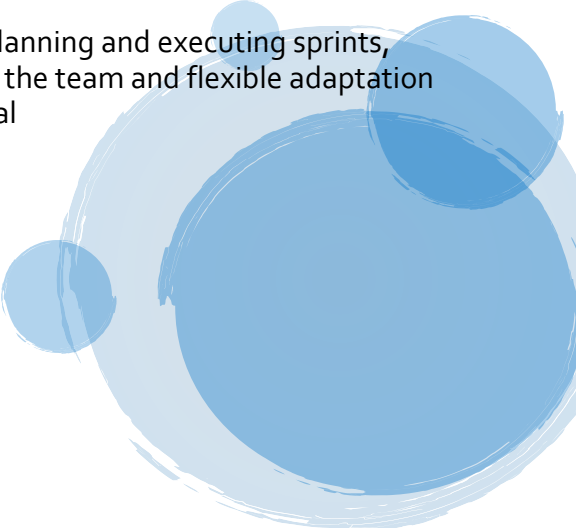

Courses taken

- scrum fundamentals – IzyAcademy

- User Interface Testing - IzyAcademy

- Fundamentals of Software Quality & ISTQB - IzyAcademy

- SQL Fundamentals - IzyAcademy

Leader in development of projects with a Scrum approach

I have had the opportunity to work in teams using the Scrum method. This approach is essential for the effective development of projects, since it allows us to work together, set clear objectives and achieve results quickly.

I acquired important skills in planning and executing sprints, effective communication with the team and flexible adaptation to changes.Experiencia Laboral

Work experience

- **Q-Vision Technologies – practices** (february 2023 - August 2023)

During my work experience that I had in this company, I have had the opportunity to participate in the complete development of software projects, from the creation and initial design, to the development and successful deployment. This comprehensive experience has allowed me to gain a deep understanding of the entire software development life cycle.
